

America's Best. Built to Last.

# Bachi BC-120R Retrofit Controls Upgrade to the Model 120

## Bachi BC-120R

Bachi has a long tradition of building great, long lasting machines and the huge, deployed, fleet of Model 120 Coil Winders deployed is proof. We kept those current customers in mind while designing our BC controls package. If you want to transform your current 120 to a modern winder, we have your solution. Send us your Model 120 As-Is, and in 2 weeks or less, we return an upgraded coil winder to you at a great value. This upgrade will undoubtedly make the machine operate easier, have faster job changeovers and overall, shorten cycle times. We built it that way so you can make more money....period! Contact us now for pricing.

## Its All About the Controls!

Bachi's new BC platform of controls uses Bachi's NEW PAS (Point And Save) Programming Technology. PAS means simple and easy programming for our customers. No calculations to make, no position compromises and no need for hand wheels. 10,000 discrete pulses per revolution for the spindle and axis movements lets us make bold statements about accuracy and repeatability. One, simple and easy, menu driven, touchscreen panel is all you need for complete machine control. Check out Bachi's NEW PAS Programming Technology today.
