

America's Best. Built to Last.

Bachi BC-12H

Heavy Duty; Single Spindle; Two Axis

BC12H

If your work specializes in heavier guage wire and/or larger coil sizes, then the BC12H will fill your needs. Mechanically it is built like a tank which falls in line with the American Made, Bachi tradition. We also included our new platform of controls (see below), which makes the BC12H the most productive heavy guage coil winder on the market.

Its All About the Controls!

Bachi built the new BC platform of machinery using the exclusive Bachi's NEW PAS (Point And Save) Programming Technology. PAS means simple and easy programming for our customers. No calculations to make, no position compromises and no need for hand wheels. 10,000 discrete pulses per revolution for the spindle and axis movements lets us make bold statements about accuracy and repeatability. One, simple and easy, menu driven, touchscreen panel is all you need for complete machine control. Check out Bachi's NEW PAS Programming Technology today.

Additional Features:

- | | |
|-------------------------|----------------|
| Tailstock | Custom Tooling |
| Programmable Tensioner | Heat Bonding |
| Closed Loop Tensioner | Wire Stripper |
| Interlock/Lock Guarding | De-Reeler |

Specifications

Spindle Diameter:	3/4"
Spindle Speed:	0 - 4,000 RPM
Spindle Rotation:	Reversible
Input Voltage:	208-240VAC, 3PH
Max Coil Diameter:	12" **
Coil Traverse Max:	8"
Wire Sizes:	Up to 8 AWG
HMI Input:	Touchscreen

** Certain limitations apply.
