

America's Best. Built to Last.

Bachi BC-44

Four Spindle; Four Axis

Bachi BC-44

Multi-spindle machines increase production rates by more than the number of their spindles. If your coil is designed in a manner that will allow multi-spindle winding, step up to the production abilities of Bachi's BC44. Like the rest of the BC family, this Coil Winder is built with operation ease, job changeover and short cycle times in mind. We built it that way so you can make more money....period!

Its All About the Controls!

Bachi built the new BC platform of machinery using the exclusive **Bachi's NEW PAS (Point And Save) Programming Technology**. PAS means simple and easy programming for our customers. No calculations to make, no position compromises and no need for hand wheels. 10,000 discrete pulses per

revolution for the spindle and axis movements lets us make bold statements about accuracy and repeatability. One, simple and easy, menu driven, touchscreen panel is all you need for complete machine control. Check out **Bachi's NEW PAS Programming Technology** today.

Feature Rich Design

We know that coils require a wide variety of peripheral attachments to complete the process:

- Tailstock
- Dead Post
- Custom Tooling
- Programmable Tensioner
- Closed Loop Tensioner
- Wire Cutter
- Wire Stripper
- De-Reeler
- Interlock/Lock Guarding

Specifications

Spindle Dia: 0.500"
 Spindle Speed: 0 - 12,000 RPM
 Spindle Rotation: Reversible
 Input Voltage: 230VAC, 3PH *
 Max Coil Dia: 4" **
 Coil Traverse: 4"
 Wire Sizes: 18 AWG or Finer
 HMI Input: Touchscreen

* Depending upon optional features.

** Certain limitations apply.
